

Two-step Authentication

Push-to-Accept Enrollment

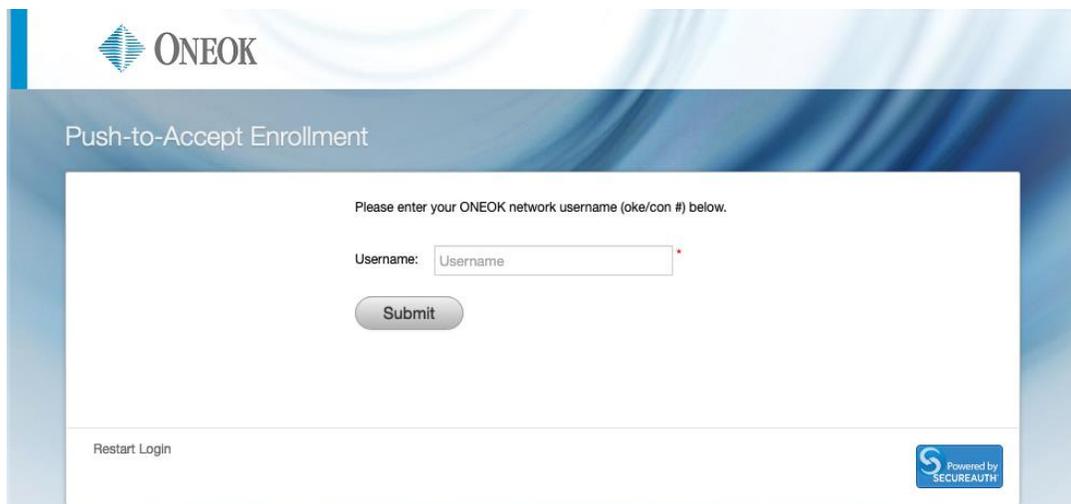

ONEOK Information Security is enhancing the two-step authentication (also known as multi-factor authentication) user experience by introducing a new push-to-accept feature.

To begin using push-to-accept:

1. On your mobile device(s), install the **SecureAuth Authenticate** app from the app store.

2. Open <https://password.oneok.com/p2a-enroll> in your web browser.
3. Enter your ONEOK username (oke#/con#) and password

The screenshot shows a web page titled 'ONEOK Push-to-Accept Enrollment'. The page has a blue header with the ONEOK logo. Below the header, the text reads 'Please enter your ONEOK network username (oke/con #) below.' There is a text input field labeled 'Username:' with a red asterisk to its right. Below the input field is a 'Submit' button. At the bottom left of the form area, there is a link that says 'Restart Login'. At the bottom right, there is a logo for 'Powered by SECUREAUTH'.

4. If you are not on a corporate PC, you may not see any options. The web page will automatically advance to the screen in step 5 and you must call the ONEOK Help Desk at 1-844-ONEOKIT for a

one-time registration code. If you are on a corporate PC, you will have several choices on how to receive a one-time Registration Code.

- a. The “Email” option will send a message to your @oneok.com Inbox with a six-digit one-time registration code.
- b. The “Soft Token” option is available only if you have previously enrolled in two-step authentication with the Google Authenticator mobile app.

The screenshot shows the ONEOK logo at the top left. Below it, the text "Push-to-Accept Enrollment" is displayed. The main content area contains the instruction "Please choose the delivery method for your Registration Code." There are two radio button options: "Email xxxxx@oneok.com" (which is selected) and "Soft Token - OTP Mobile App". A "Submit" button is located below the options. At the bottom left, there is a "Restart Login" link. At the bottom right, there is a logo for "Powered by SECUREAUTH".

5. Enter the one-time Registration Code delivered by the method chosen in the previous step. If you are not on a corporate PC, there will be a message directing you to contact the ONEOK Help Desk at 1-844-ONEOKIT to retrieve your one-time Registration Code:
